EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of issue fee.

Authorization to amend claims 14 and 17 and to cancel claim 16 was given in telephone interview with Edward Brooks (Reg. No. 40,925) on March 27, 2006. Authorization to amend claims 1 and 4 was given by Mr. Brooks on April 27, 2006.

2. The application has been amended as follows:

Claim 1:

1. (Amended by the Examiner) A template for a scanning system, the template comprising:

a template body, and

a plurality of actuation devices disposed on the template body each for actuating a respective switch of a plurality of switches disposed on a transparent media adapter, actuation of the switches, based on a type of media supported by the template.

Claim 4:

4. (Amended by the Examiner) The template according to claim 1, wherein the switches are on the transparent media adapter and the actuation devices are protrusions.

Art Unit: 2625

Claim 14:

14. (Amended by the Examiner) A method of scanning an image on a transparent media in a scanner system, the method comprising:

actuating, by a template comprising an actuation device, a first switch on a transparent media adapter included in the scanner system;

transmitting, by the transparent media adapter, a signal to a computer connected to the scanner system in response to actuation of the switch; and

directing, by the computer, the scanner system to execute a scan routine associated with the signal;

wherein the transparent media adapter having a plurality of switches, the template having a plurality of actuation devices, actuating two or more switches of the plurality of switches with two or more of the actuation devices, the transmitted signal dependent on the combination of switches actuated.

Claim 16: cancelled

Claim 17:

17. (Amended by the Examiner) The method according to claim 14, further comprising interrogating, by the computer, a database of scan routines each associated with one of a plurality of signals, the executed scan routine associated with the transmitted signal.

Reasons for Allowance

1. Claims 6, 11 and 16 have been canceled.
2. Claims 1-5, 7-10, 12-15 and 17-23 are allowed.
3. This is examiner's statement of reasons for allowance.

Regarding claims 1-5, 7, 8 and 9, 10, 12, 13, 23 the prior art either singularly or in combination does not teach a template for a scanning system, the template comprising:

A plurality of actuation devices disposed on the template body each for actuating a respective switch of a plurality of switches disposed on a transparent media adapter. Actuation of the switches, based on a type of media supported by the template, would automatically put the document scan system and the computer in the proper operation mode.

Regarding claims 14, 15 and 17, the prior art either singularly or in combination does not teach a method of scanning an image on a transparent media comprising the transparent media adapter having a plurality of switches, the template having a plurality of actuation devices, actuating two or more switches of the plurality of switches with two or more of the actuation devices, the transmitted signal dependent on the combination of switches actuated.

Regarding claims 18-22, the prior art either singularly or in combination does not teach a scanner system for optically scanning a media, the scanner system comprising:

a reflective scanner comprising a platen, a lamp, an optic system and one or more photosensitive devices; a transparent media adapter comprising a switch disposed on a housing of the transparent media adapter, the transparent media adapter operable to illuminate a

Art Unit: 2625

transparent media and to transmit a signal to a computer coupled to the scanner system upon actuation of the switch; and a template comprising an actuation device for actuating the switch, the computer directing the scanner system to execute a scan routine upon reception of the signal.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
